

ECRA Quality Dashboard

A Scorecard to the Community

Snapshot of Quality Dashboard

Communicate Quality while Promoting Stakeholder Trust

Communicating the quality of a school system is essential to promoting public trust and demonstrating the effectiveness of leadership, programming and operational structures. Quality dashboards – both external and internal – are emerging as vital tools to educate stakeholders on district performance. The ECRA quality dashboard offers a customized, online, at-a-glance look at district and school performance in achievement, finance and other critical areas of focus, and can be used to measure against state and national benchmarks.

Customized Quality Dashboard Solutions

The ECRA Quality Dashboard is a user-friendly, graphically dynamic and cost-effective way of displaying a customized profile of your school district's performance. District leaders choose the quality indicators that are important to their constituencies, which can include areas such as:

- Student Achievement (State and National Test Performance, Graduation Rate, AP Enrollment and Performance)
- Customer Satisfaction
- District Climate
- Community Relations
- Finance and Resources

The dashboard is flexible and can accommodate a wide variety of factors, giving users a broad picture of a school district's quality. Under each indicator, users can view performance data broken down into detail by school, grade level or stakeholder group.
